

1. Can you walk me through your background and experience as a full stack developer?
2. Imagine you are working on a project with tight deadlines, and your team faces technical challenges. How would you approach this situation to ensure the project stays on track?
3. Tell me about a time when you had to prioritize tasks in a high-pressure project environment. How did you decide what needed immediate attention and communicate this effectively with your team?
4. In a project where requirements change frequently, how do you adapt your work and ensure that the changes are reflected in both front-end and back-end development?
5. Tell me about a challenging bug you encountered during a project and how you approached debugging it in both front-end and back-end code.
6. When working on a project with team members who have different technical backgrounds, how do you ensure effective communication and collaboration to achieve the project goals?
